What is Mozilla ?

Infographic Style

Mozilla makes browsers, apps, code and tools that put people before profit.

Our mission: Keep the internet open and accessible to all.

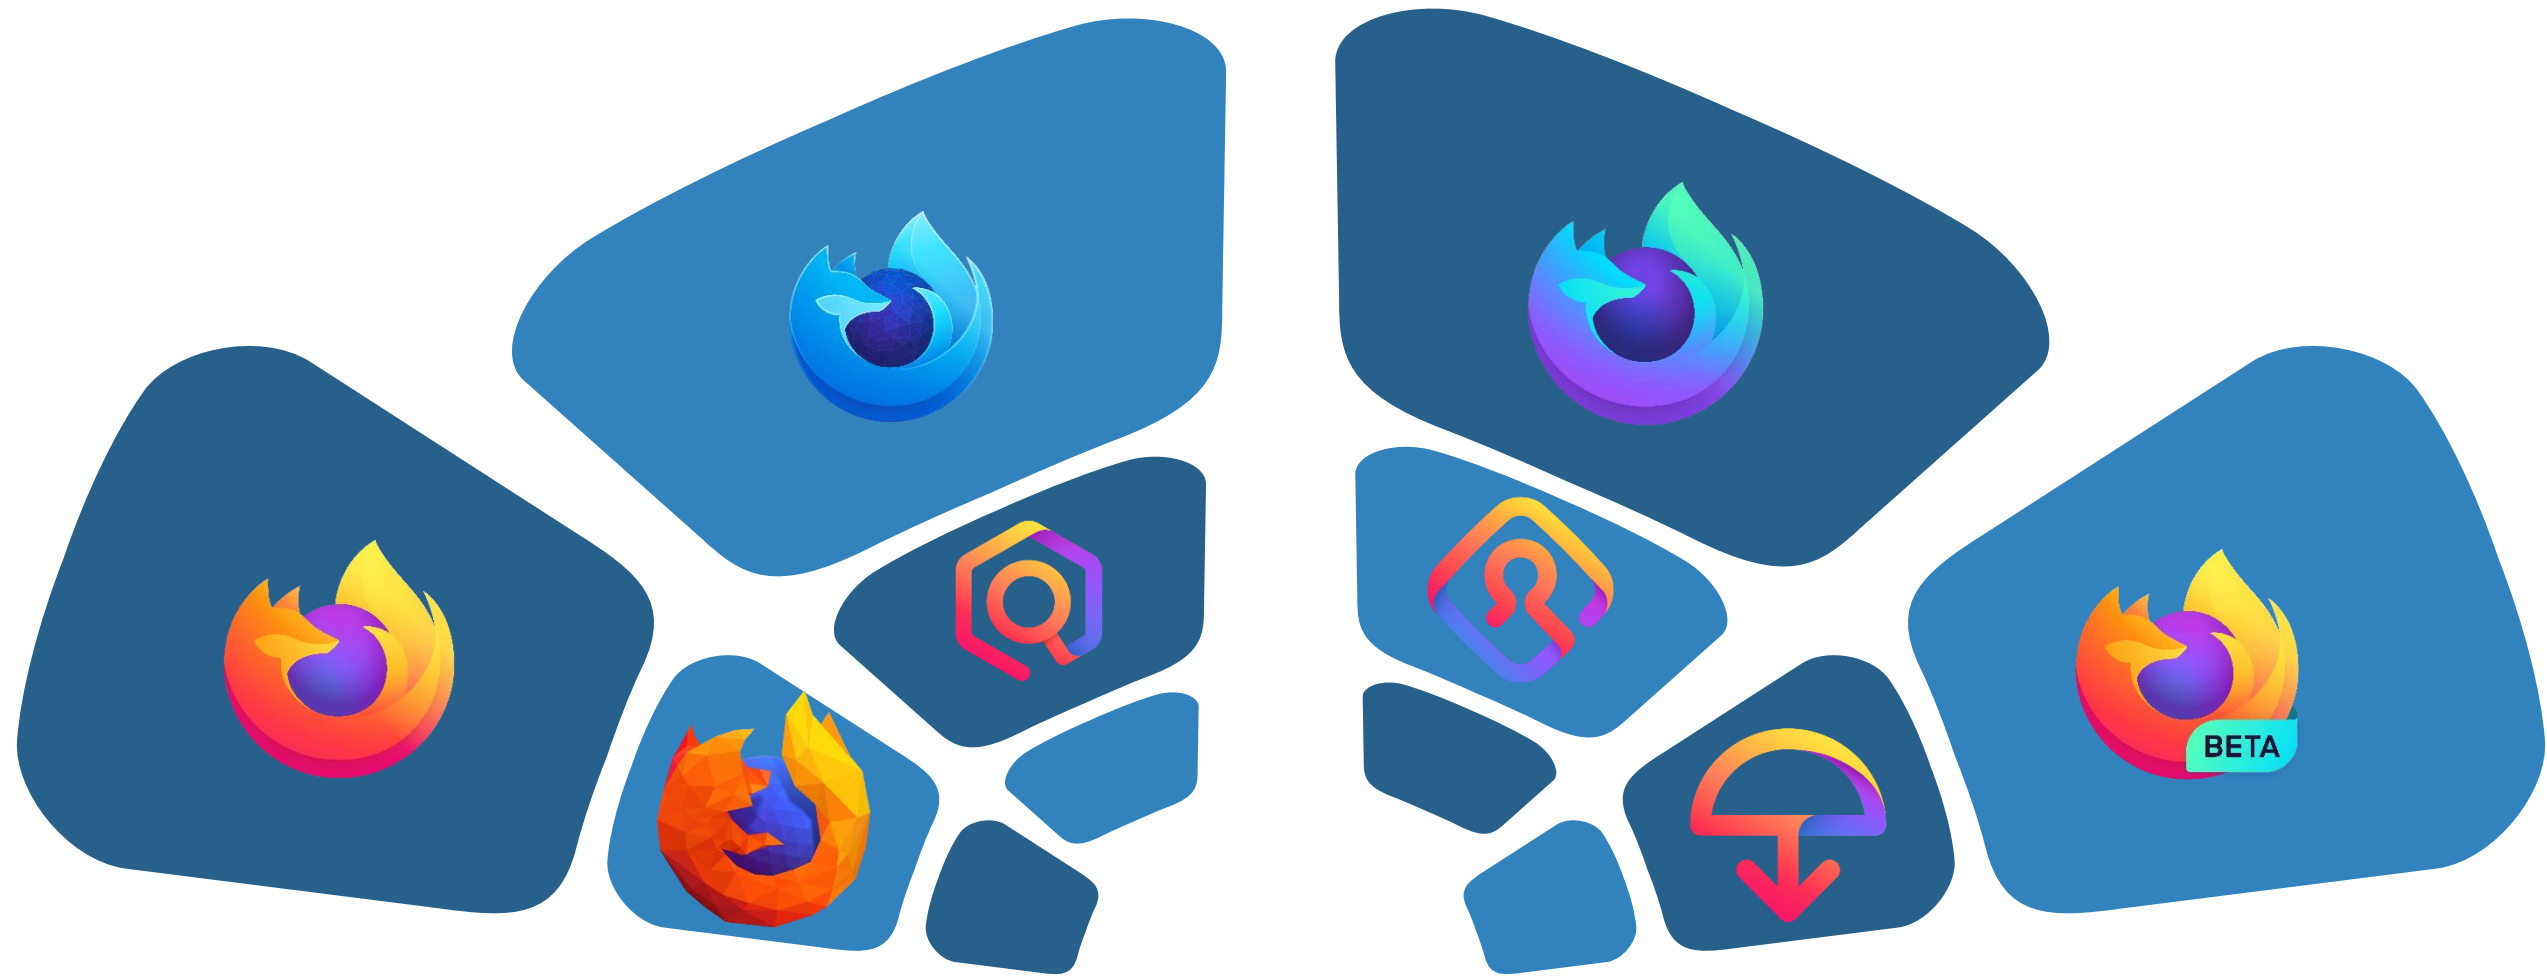

The Mozilla Foundation works to ensure the internet remains a public resource that is open and accessible to us all.

Mozilla Manifesto

- The Mozilla Manifesto outlines Mozilla's goals and principles.
- It asserts Mozilla's commitment to the internet, saying: "The open, global internet is the most powerful communication and collaboration resource we have ever seen. It embodies some of our deepest hopes for human progress."
- It then outlines what Mozilla sees as its place in the development of the internet, stating "The Mozilla project uses a community-based approach to create world-class open source software and to develop new types of collaborative activities".

Mozilla Products

Firefox for *Android*

Mozilla Projects

moz://a

Mozilla Common Voice

The new home for machine-learning based voice technologies -- including software, tools, and datasets.

Speech & Machine Learning

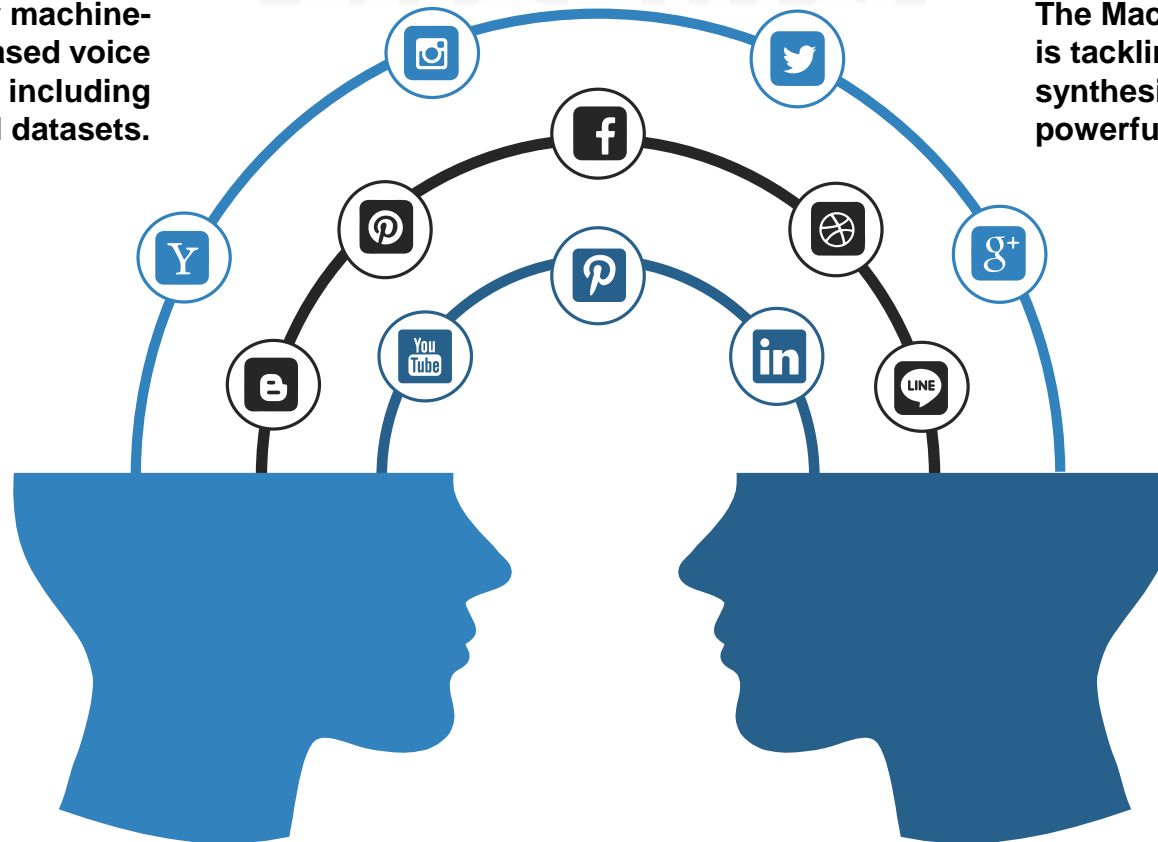

The Machine Learning Group at Mozilla is tackling speech recognition and voice synthesis as its first project. Speech is powerful.

Firefox Reality

Firefox Reality serves you the very best immersive games, videos, environments, and experiences from around the Web.

Mozilla Hubs

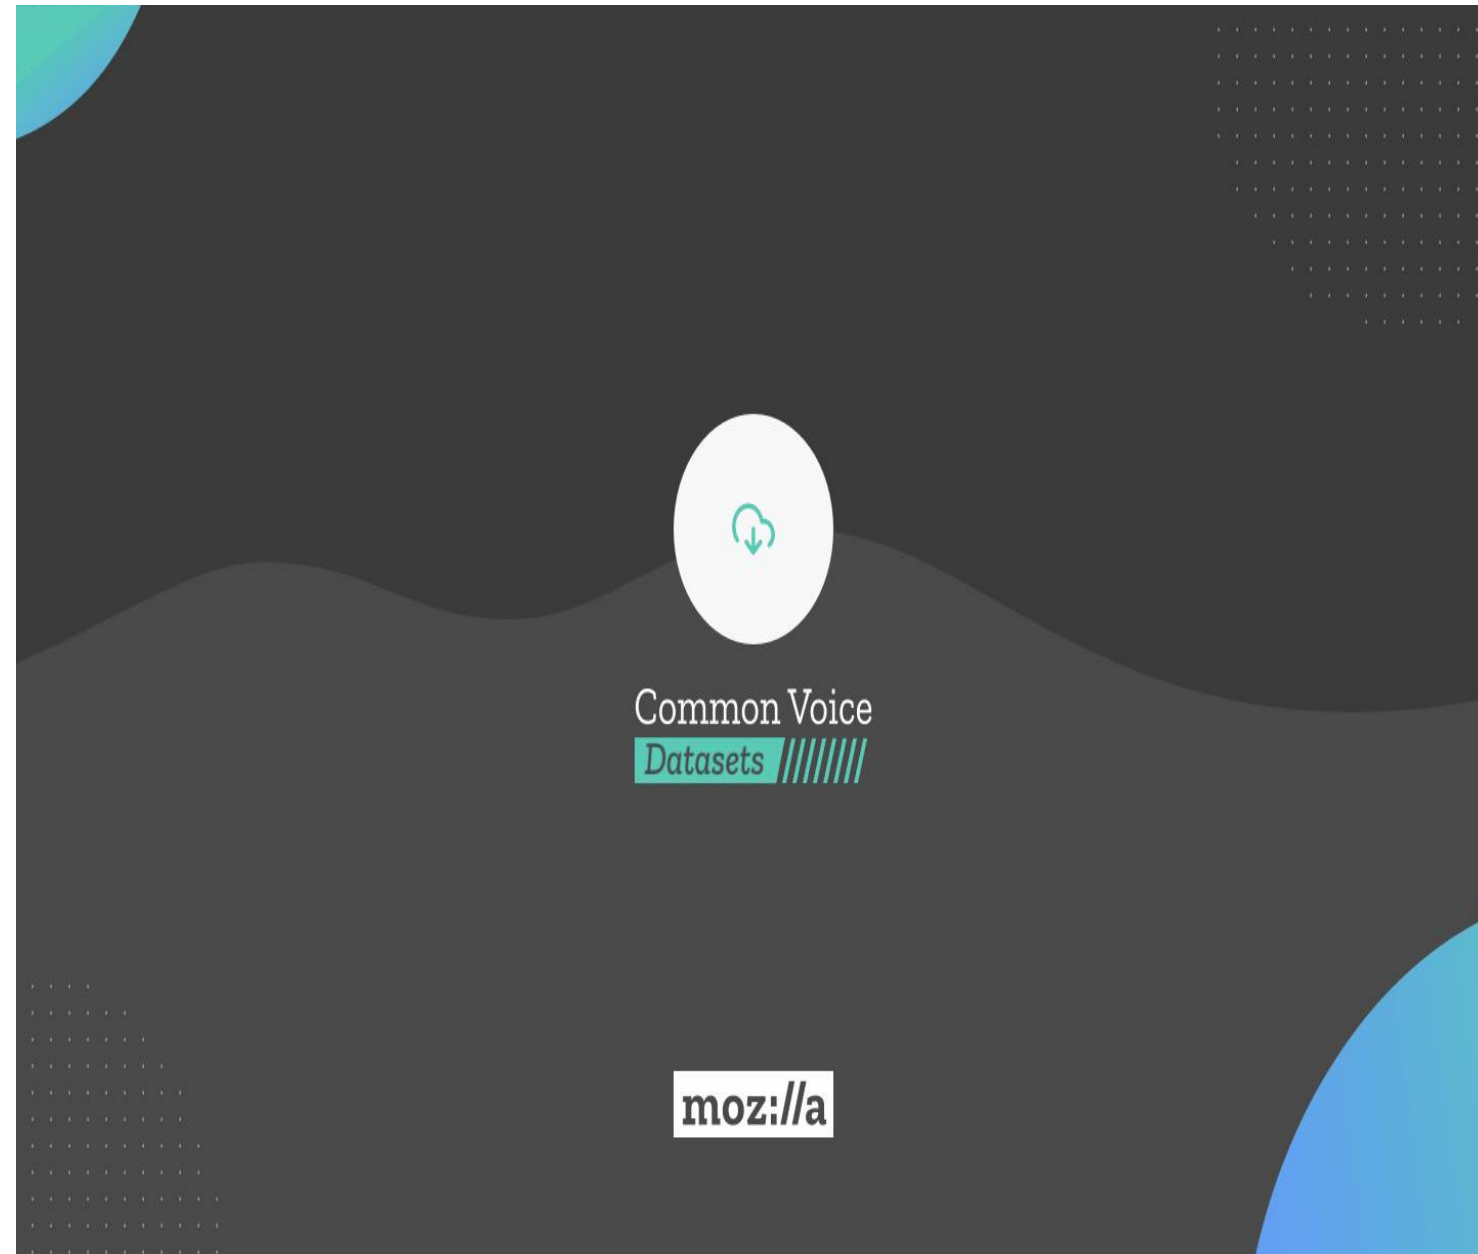

Share a virtual room with friends. Watch videos, play with 3D objects, or just hang out.

Mozilla Common Voice

Common Voice Contains three main projects.

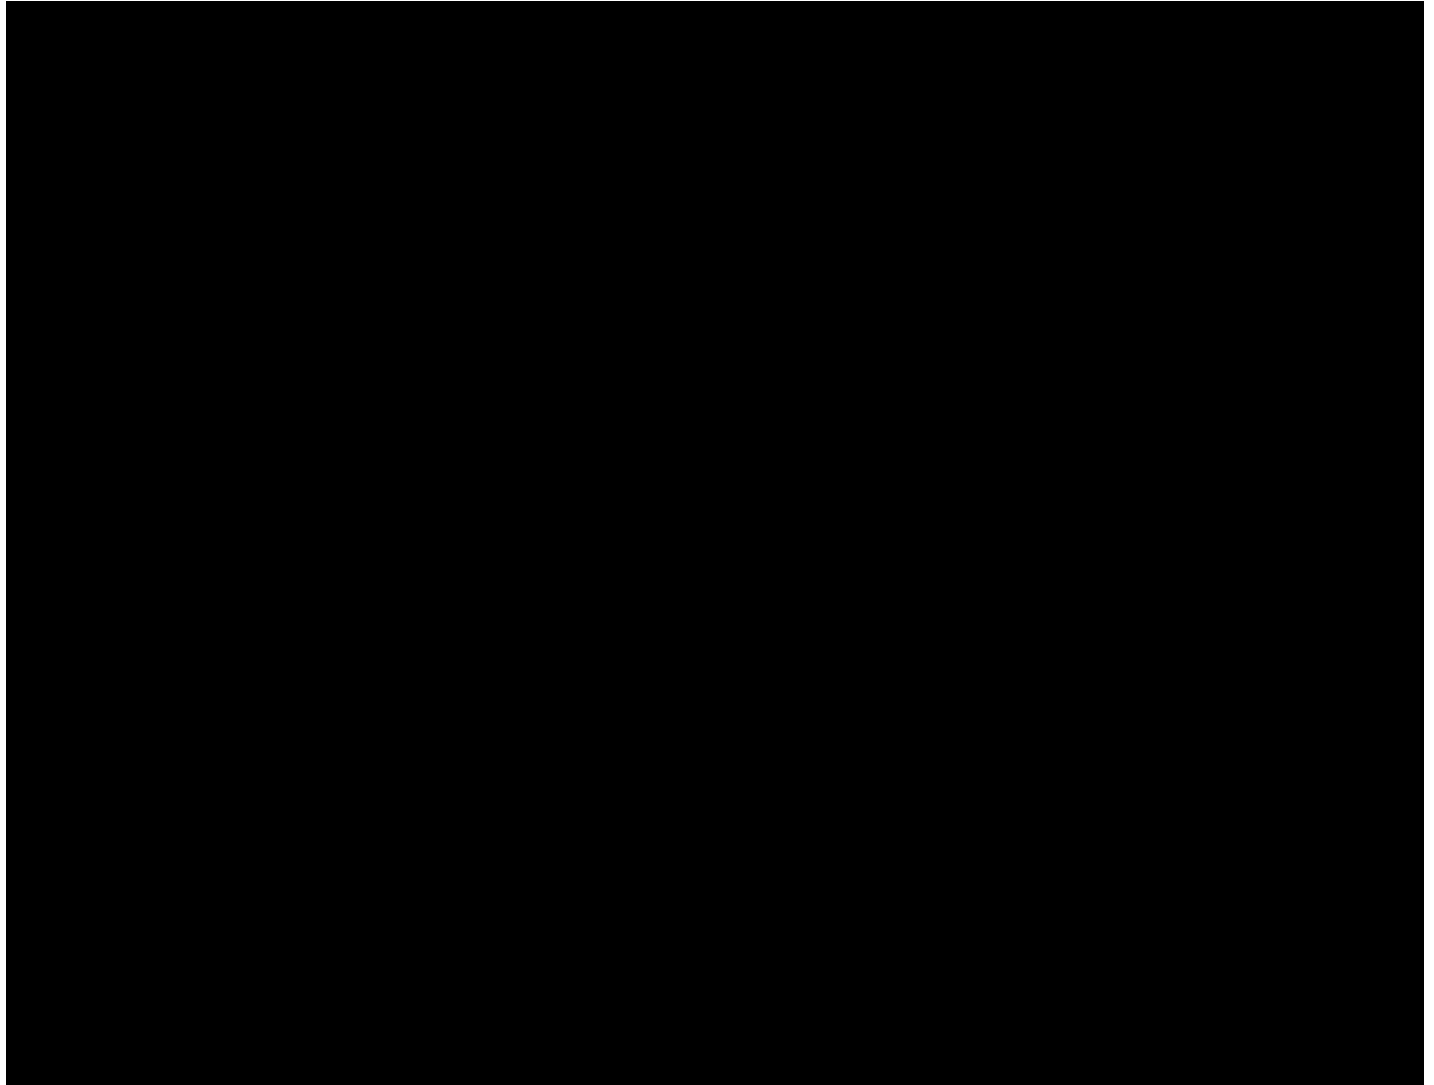

- **Common Voice** - Common Voice is Mozilla's global crowdsourcing initiative to build multilingual open voice datasets that help teach machines how real people speak.
- **Mozilla Voice STT** - Our open source Speech-to-Text engine, that can run on anything from an off-line Raspberry Pi 4 to a server class machine, implemented with Google's TensorFlow framework.
- **Mozilla Voice TTS** - Built with advanced machine learning methods (Tacotron), our open source Text-to-Speech engine enables high quality, natural and human-like voice synthesis.

Firefox Reality

In September 2018, Mozilla announced that its VR version was ready for consumers to download. Called Firefox Reality, the browser was built entirely for virtual reality. It is currently available on the Oculus.

In January 2019, HTC also announced its partnership with Mozilla. Under the partnership, Firefox Reality web browser has been made available on the Vive headsets.

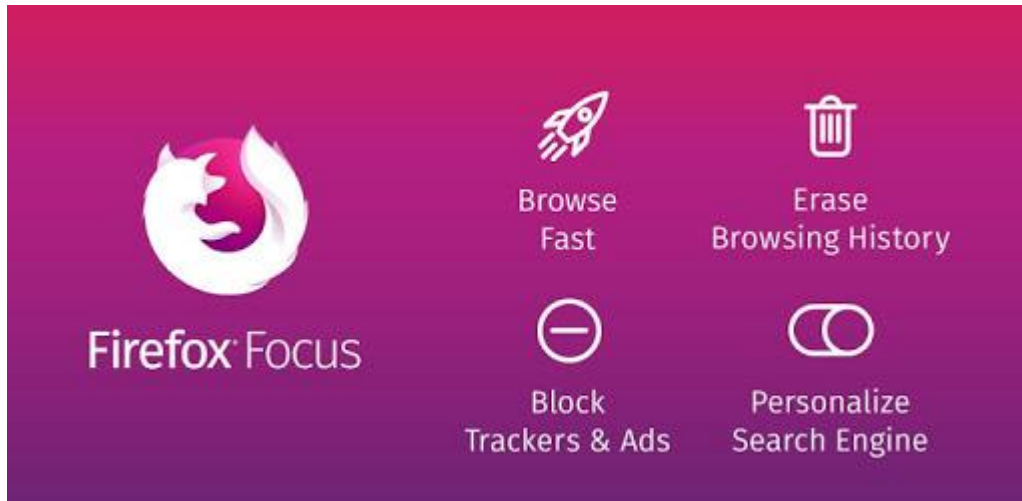

Mozilla Hubs

On 26 April 2018, the first experiment from Mozilla Virtual Reality team's Social Mixed Reality efforts was released; Hubs, a multi-user virtual space in WebVR.

Firefox Focus

Firefox Focus is a free and open-source privacy-focused mobile browser for Android and iOS. Initially released in 2015 as only a tracker-blocking application for iOS, it has since been developed into a full mobile browser for both iOS and Android.

Firefox Lockwise

Firefox Lockwise is a password manager offered by Mozilla. On desktop, it is a built-in feature of the Firefox browser. On mobile, it is offered as a standalone app that can be set as the device's default password manager.

Firefox VPN

Mozilla VPN, formerly Firefox Private Network, is an open-source virtual private network web browser extension, desktop application, and mobile application developed by Mozilla.[1] It launched in beta as Firefox Private Network on September 10, 2019, and officially launched on July 15, 2020 as Mozilla VPN.

Firefox OS

Firefox OS (project name: Boot to Gecko also known as B2G) is an open-source operating system that was developed by Mozilla to support HTML5 apps written using "open Web" technologies rather than platform-specific native APIs. The concept behind Firefox OS is that all user-accessible software will be HTML5 applications, that use Open Web APIs to access the phone's hardware directly via JavaScript.

Some devices using this OS include Alcatel One Touch Fire, ZTE Open, and LG Fireweb. Mozilla announced the end of Firefox OS development in December 2015.

A fork of B2G, KaiOS, has continued development and ships with numerous low-cost devices.

Pocket

Pocket is a mobile application and web service for managing a reading list of articles from the Internet. It was announced that it would be acquired by the Mozilla Corporation, the commercial arm of Mozilla's non-profit development group, on February 27, 2017.

Originally designed only for desktop browsers, it is now available for macOS, Windows, iOS, Android, Windows Phone, BlackBerry, Kobo eReaders, and web browsers.

Thunderbird

Thunderbird is a free, open-source, cross-platform email and news client developed by the volunteers of the Mozilla Community.

On July 16, 2012, Mitchell Baker announced that Mozilla's leadership had come to the conclusion that on-going stability was the most important thing for Thunderbird and that innovation in Thunderbird was no longer a priority for Mozilla. In that update Baker also suggested that Mozilla had provided a pathway for its community to innovate around Thunderbird if the community chooses.

IRL

IRL – Online Life is Real Life (also known as IRL for short) is a podcast by Firefox. The podcast discusses how activity on the internet affects society as a whole, such as privacy and security. The first episode aired on June 26, 2017, titled All Your Data Are Belong to Us. Each season lasts 7 episodes long, with some seasons including bonus episodes.

It was hosted by Veronica Belmont from season 1 to season 3, then hosted by Manoush Zomorodi for season 4 and 5.

On August 10, 2017, Veronica Belmont announced that the podcast had reached 500,000 downloads.

On November 8, 2017, Dan Misener wrote that the podcast had reached 1 million downloads by the end of the first season.

In 2018, the podcast won a Webby Award for "Best Branded Podcast or Segment" in the category "Podcasts & Digital Audio Features".

Mozilla Community

Mozilla Communities

- **The Mozilla Community consists of over 40,000 active contributors from across the globe. It includes both paid employees and volunteers who work towards the goals set forth in the Mozilla Manifesto. Many of the sub-communities in Mozilla have formed around localization efforts for Mozilla Firefox, and the Mozilla web properties.**
- **There are a number of sub-communities that exist based on their geographical locations, where contributors near each other work together on particular activities, such as localization, marketing, PR and user support.**

Mozilla Reps

- The Mozilla Reps program is a volunteer-based program, which allows volunteers to become official representatives of Mozilla.
- Volunteers are required to be 18 years or older in order to participate in the program. .
- Activities under the program include recruitment for contributors, workshops, and attending Mozilla summits.
